

T-BOB

A l'exception des pneus, Avon, et le radiateur, Pace Products. Dix mois de travail, tout fait main, une mécanique de S4 R, Ducati 996, et voilà le travail.

Roger decided 3 years ago that he would concentrate his efforts into becoming a custom bike designer. He studied at Coventry University and then went on to build the stunning T-Bob in conjunction with Ducati UK. This bike was recently shown for the first time at the AMD Proshow in Las Vegas. All of his efforts are now focused towards building and designing the best cusombikes and parts on the planet

Source, mais en anglais ==> allmond cycle design
